

# SCIENCE & STARTUPS

## WHY SCIENCE-BASED STARTUPS?

You have an idea that should become reality? Your research could make the world a better place if turned into a product or service?

The Science & Startups network will support you on your way!

## WHO DO WE SUPPORT?

The startup support provided by the Science & Startups network partners is aimed at researchers and students who have innovative, technology- or science-based ideas.

# HOW DO WE SUPPORT YOU?

OUR STARTUPS ARE TRAINED IN A SYSTEMATIC, SUSTAINABLE AND IMPACT-ORIENTED ENTREPRENEURIAL WAY.

We offer:

- Founder scholarships
- Co-founder and talent matching
- Qualification in business management
- Scientific mentoring
- Networking with investors and established companies
- Access to infrastructure such as office space, labs and prototyping workshops

Our support for startups is free of charge and (in contrast to many private incubators) is not linked to the sale of company shares.

Embedded into the Science & Startups ecosystem, our startups can enjoy the offers of the three Berlin universities, the Charité and its partners.
